

## **1. Activities and aims of the WG on Immune and Non-immune Thrombocytopenias**

Provide a platform to scientists with common interests to bring their expertise to EHA meetings and interact

Proposed fields of interest:

1. Immune thrombocytopenic purpura in adults and children
  - autoimmune, idiopathic
  - autoimmune, secondary
  - alloimmune
  - post-transfusion purpura
2. Non immune, congenital/hereditary thrombocytopenias
3. Drug-induced thrombocytopenia

Furthermore:

- Identify priorities for future activities or collaborative studies in the field
- Create a network of excellence, including investigators expert in the field and centers or laboratories, as a basis for specific projects
- Discuss problems concerning nomenclature, standardization and methodology

Plan specific projects to be presented to founding agencies
